The Eminent e-Domotica control panel is the heart of your home automation system. For easy installation and control of the alarm system, video security, lighting, appliances.

Simple controls via the e-Centre Control Panel
Dim the lights as soon as you start watching TV. And if you go out? Turn on the alarm via the e-Centre Control Panel.

Alarm reports by means of sms, telephone and email
Don’t let a burglar carry on undisturbed! In case of a fire or burglary you receive an sms, so you can immediately take action.

Turning off equipment for comfort and safety
Operating equipment via e-Domotica is not only handy but also provides more safety at home. Who turns on the light if the smoke alarm is set off at night?

Save energy, stop standby consumption
At the touch of a button, you turn off electrical equipment entirely. You prevent equipment from remaining on standby, which reduces your energy costs.

Wireless connection to your home network
e-Domotica establishes connection to the Internet so you have access to live images from the security camera from anywhere in the world.

To be used in combination with other e-Domotica products from Eminent
